LIBRARY MANAGEMENT SYSTEM

USING

Project Description

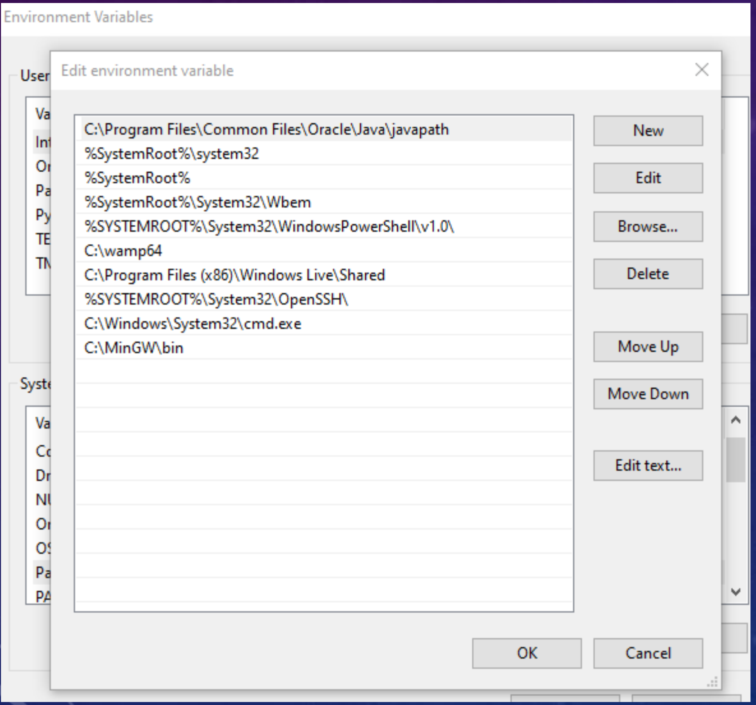
The **Library Management System (LMS)** is a software application designed to efficiently manage library operations. This system will allow users to **catalog books**, manage member records, track book borrowing, and automate return processes. It integrates **class inheritance, polymorphism, arrays, and file handling** to ensure a structured and optimized workflow.

Project Setup

Initialize the project using JDK and IDE (Eclipse/IntelliJ).

•**Define the project structure** with proper packages and modular coding.

•**Setup the database** using MySQL and implement JDBC for connectivity.



JDK Setup in Environment variable

Library Management System:
Developed using **Java Swing, AWT, and MySQL**, this system enables seamless book cataloging, borrowing, and returning."
Features Slide:
•Add, Issue, and Return books effortlessly
•Secure database management using **JDBC & MySQL**
•User-friendly UI with **Java Swing and AWT**

My SQL CONNECTION

- Java file is connected to MY SQL Database

Technology Stack Slide:

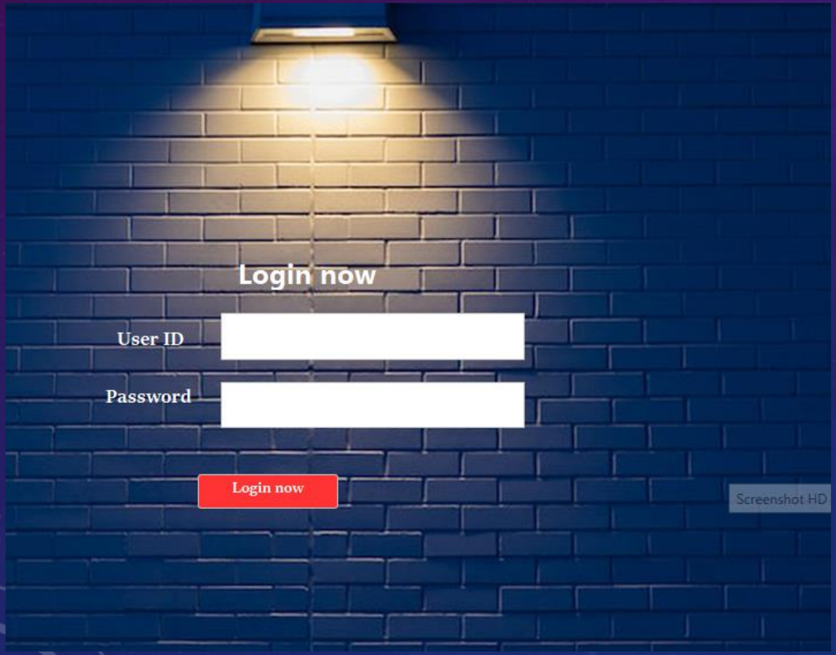
"Built using **Java, JDBC, MySQL, Swing, and AWT** for a smooth and interactive experience."

```java
 * Click nbfs://nbhost/SystemFileSystem/Templates/Licenses/license-default.txt to change this license
 * Click nbfs://nbhost/SystemFileSystem/Templates/Classes/Class.java to edit this template
 */

import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.SQLException;
import java.util.logging.Level;
import java.util.logging.Logger;
/**
 *
 * @author Sudhir Kushwaha
 */
public class Connect {
    static Connection con=null;
    public static Connection ConnectToDB() {
        try {
            con=DriverManager.getConnection("jdbc:mysql://localhost:3306/library","root","1234");
        } catch (SQLException ex) {
            Logger.getLogger(Connect.class.getName()).log(Level.SEVERE, null, ex);
        }
        return con;
```

LOGIN SYSTEM

- First user should login then.
- This is the login page.



```
    }

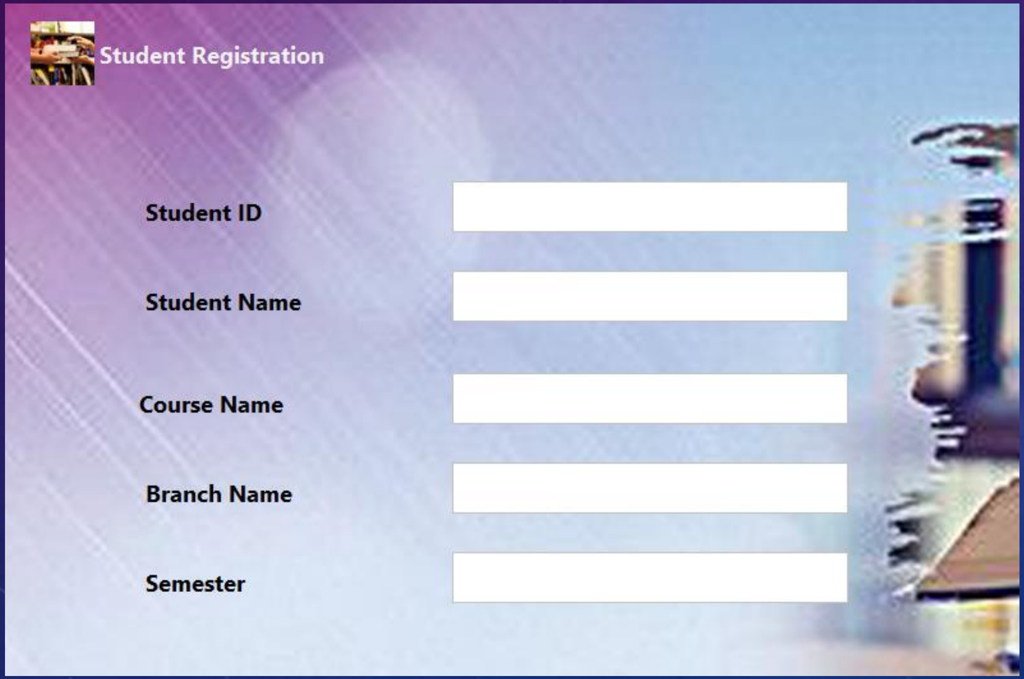
    // Variables declaration - do not modify
    private javax.swing.JButton btnlogin;
    private javax.swing.JButton jButton6;
    private javax.swing.JLabel jLabel1;
    private javax.swing.JLabel jLabel2;
    private javax.swing.JLabel jLabel3;
    private javax.swing.JLabel jLabel4;
    private javax.swing.JLabel jLabel5;
    private javax.swing.JTextField txtemail;
    private javax.swing.JPasswordField txtpassword;
    // End of variables declaration
}
```

HOME PAGE:

-Easily **add** new books, **issue** them to users, and **return** borrowed books with just a click.

STUDENT REGISTRATION:

Enter **Student ID, Name, Course, Branch, and Semester** to create a profile and access library resources seamlessly.



More to come—this is just the beginning!
